

PATIENTS DESERVE TO KNOW SMOKING vs. VAPING

Vaporizing (aka "vaping") is a far healthier way to ingest cannabis, compared to combusting (aka "smoking"). To help patients choose the healthier alternative, Temescal Wellness sells a variety of industry leading vaporizers. Ask your Patient Service Associate today!

PATIENTS DESERVE TO KNOW WHAT IS VAPORIZATION?

Vaporization delivers therapeutic cannabinoids with far less harmful carcinogens than in combustion. Vaporizing, or "vaping", raises the temperature just high enough to release the therapeutic molecules of the cannabis plant, or "cannabinoids", but not so high that it unnecessarily releases other carcinogenic substances.

BENEFITS OF VAPING:

REDUCED HARM ON LUNGS

LESS HARMFUL TOXINS

FEWER SIDE EFFECTS

MORE EFFICIENT

Temescal Wellness promotes the responsible use of therapeutic cannabis for patients registered in accordance with New Hampshire law. Patients should use cannabis only under the advice of a certifying provider.
